

TECHNICAL DATA SHEET

OF03 TACTICAL RANGER HIKER

DESCRIPTION

A non-safety occupational style, the Ranger hiker is fully waterproof with YKK side zip for easy put-on and removal. Featuring fully non-metallic construction, midsole to protect the foot against objects that penetrate from below, Blackrock's HSL GRIP 4 rated HexaGrip sole that gives market-leading slip resistance to keep you on your feet when it matters most and EaziStep padded insole for maximum comfort when on your feet for long periods, it is ideal for personnel who are not required to wear safety footwear as part of their uniform.

SIZES

UK 3-15

STANDARDS

EN20347 O3 WR
FO HRO SRC

KEY FEATURES

- Lightweight metal-free composite midsole
- Waterproof leather upper
- YKK side zip for easy put on and removal
- HexaGrip ultra non-slip sole
- 300°C heat resistant, anti-static and fuel oil resistant PU/rubber sole
- EaziStep padded and breathable insole for comfort
- Blood borne pathogen resistant

Blackrock's HexaGrip technology features a hexagonal sole pattern that gives significantly increased grip, achieving a 4 star rating in the UK HSE GRIP scheme, far exceeding the international SRC slip resistance standard.

Blackrock's EaziStep insole is made from lightweight PU/mesh that gives all day comfort and relieves tension in areas vulnerable to stress such as the heel area and ball of the foot.

CERTIFICATION/MARKINGS

EN ISO 20347:2012 is an internationally recognised standard which specifies requirements for occupational footwear. Any product which references an EN standard must have the relevant certification attributed to the product code found on the product.

The product standard can be found on the tongue label and should match that stated on the certification. The standard is usually a group of numbers and letters, for example O3 FO HRO SRC. These letters and numbers denote the characteristics that make up the footwear you are buying which include properties such as water-resistant uppers, protective midsole, fuel oil resistance, anti-static, heat resistance and slip resistance.

Users are advised to select the required class of performance based on the risk assessment of the location and/or task as appropriate.
